CHAPTER III

RESEARCH METHODOLOGY

3.1. Research Design

This study used a qualitative approach. It is the most suitable one to use analyzing this research and also appropriate for this research because it is considered to result in a detail description about language style. According to Sari Wahyuni (2012:76). Qualitative is an inductive approach and its goal is to gain a deeper understanding of a person's or group's experience. It means the data collected in qualitative research is explaining the description of people, places and conversation clearly and detail. Moreover, the data gets in form of words rather than number.

3.2. Instruments

In this research, the researched the meant instrument in obtaining and analyzing the data. To get the data, the researcher collected in the "Two Fast and Two Furious" movie, the instruments of this research are the writer herself, video cassette "Two Fast and Two Furious", and some books reference related to the topics. The writer is the one who is able to find appropriate tools such as television used to watch movie. After that, the resercher searches the transcript of the "Two Fast and Two Furious" movie.

3.3. Data and Data Sources

For doing the research, there were some steps that would be done by the researcher. The writer finds an appropriate conversation when she watched the movie, and sources of transcript. The writer took directly to the data that consist about language style that used.

3.4. Data Collection

There were some steps that was used by the writer to collects the data for research. In collecting the data, this study followed some steps in collecting the data.

a. The writer watched "Two Fast and Two Furious" movie to understand more what the story is about.
b. The writer searched "Two Fast and Two Furious" script of the movie in Google, one of the servers on the world wide web which provides many kinds of information. After that, the writer downloads the script in order to help the writer to be able to see all of kinds of language style that appear and the writer reads "Two Fast and Two Furious" movie script dialogues.

3.5. Technique of Collecting Data

After collecting data, the writer transcribed the movie and identified the utterances that contained language style used, the writer did some steps to analyze the data. First, the writer listed the data which contain style used in the "Two Fast and Two Furious" movie.

Then, the writer classified them based on language style by Martin Joss (1976) which discusses the language style. In conclusion, in analyzing the data, the procedures were also conducted as follows:

0. The data were collected from the movie by gaining the tanscript of the conversation occured in the movie.
1. The data were selected and grouped into the five language styles.

2. The data transcripts are classified and identified based on their styles.
3. The data were analyzed.
4. The last, the writer interpreted the result of the analysis to make the conclusion.
