

method and particular etiquette that should be obeyed and respect. Therefore, it is very reasonable and prosecuted towards the conscious Muslim to give a small space to deepen and refine this great knowledge. Prepare yourself with the particular instrument in order to interact with this sunnah heritage. Complete the combat weapons before enter the battlefield, not to mention the weapons that is said is the most basic weapons that should be owned by the entire warrior. Even the fighters from any field should own this weapon. The salaf scholar should be as lesson. The previous great fuqaha is in direct very pursuit this field. Take the example from the mazhab scholar and the previous mujtahidin, they were great in fiqh and at the same time they were also prominent in the knowledge of hadith. Imam Shafiee was an imam in the field of fiqh until he achieved the level of mazhab and at the same time a great scholar in the field of hadith, that is how being made as example of Imam Nawawi, the mujtahid in mazhab Shafiee, in the same time he is a professional in the hadith study. The scholars nowadays should do the same thing. Do not this knowledge of hadith being left behind and being isolated. This knowledge is actually the solution to the numerous of confusions and problem. Prophet SAW had showed this sign when He imagining that there will be a lot of ikhtilaf and khilaf in future, anyone who be in the time mentioned, should cling onto my sunnah and the sunnah of my successor that had been given with the guidance. (al-Tirmizi: 2011)
